Label Amendment – Revising use rate for specific crops

Dear Ms. Roe,

Wagner Regulatory Associates, Inc., as agent for Stockton (Israel) Limited, is submitting an amendment to the Master label for the above referenced product with the inclusion of a supplemental label for these changes.

An amendment for this label was submitted on June 22, 2020 with changes to the following use rates: soybeans, rice, and wild rice. None of these rate changes exceed the maximum yearly use rate. These changes from the June 22nd submission have been included with this submission as well.

This amendment includes changes to:
- Minimum spray volumes for ground and aerial applications. These changes are comparable to the use rates for difenoconazole found in the product Miravis Top (EPA Reg. No. 100-1602, Sections 4.3 and 7.5 of the label).
- Changes to the wording in the spray drift language. Nozzle size, as listed, has caused problems in the field and needs to be corrected to ensure applications are effective. The wording is comparable to the spray drift language found in Miravis Top (Section 6.3).
- Corrections to pests controlled

I have enclosed the following for your consideration:

- Letter from Stockton (Israel) Limited, appointing WRA, Inc. as its agent
- Application Form (8570-1)
- Certification with Respect to Label Integrity Form
- Label (1 highlighted copy, 1 clean copy)

If you have any questions about this submission, please contact the undersigned at rachel@wagnerreg.com or (302) 635-7289.

Respectfully submitted,

Rachel L Hardie
Agent for Stockton (Israel) Limited
